

দুর্গাবাড়ী
Durgabari

VISION REALISED

- * Replacement of deteriorated water tanks and old pipelines with new CPVC piping systems.
- * Extensive waterproofing of walls, terraces and other vulnerable areas to prevent seepage and structural damage.
- * Repair, restoration and replastering of damaged walls and structures.
- * Painting of the temple, auditorium and common areas using durable waterproof exterior coatings.
- * Renovation and refurbishment of rooms and dormitory facilities.
- * Replacement of old windows and sanitary fittings.
- * Rodent-proofing of the bhog store to improve hygiene and food safety.
- * Upgradation and improvement of the bhog kitchen and office block.
- * Installation of high-power LED lighting for enhanced illumination and energy efficiency.
- * Preparatory work for the installation of an IP-based CCTV surveillance system to strengthen security.
- * Installation of a lithium-ion battery backup system to ensure uninterrupted power supply during outages.
- * Installation of air conditioners in rooms to improve comfort and usability.
- * Provision of a protective enclosure for the electrical panel to safeguard it against dust, moisture and accidental damage.
- * Successful commissioning and operation of the solar power system, resulting in improved energy efficiency and reduced electricity expenditure.
- * Overall implementation of a comprehensive programme of renovation, restoration and infrastructure development aimed at strengthening, preserving and modernising the facilities of Durgabari.

These initiatives collectively reflect the Governing Body's continued commitment to the preservation, safety and long-term development of Durgabari.
